

# The Arctic Reagion

Made by: Robin, Griffin, Devan,  
Austin, and Josh

# Landforms

- There are lots of different Landforms in the Arctic region
- There are tons of mountains such as the Mackenzie mountain
- There are also lots of glaciers.

- **There are tons of valleys too**

- There are two different types of plains Coastal and low leveling plains!
- There are lots of different types of glaciers

# Climate

- Long freezing winters
- Short cool summers
- The coldest temp in the arctic region is  $-56^{\circ}\text{C}$
- Warmest is  $21^{\circ}\text{C}$
- There summers are very dry so are the winters
- In the arctic is usually cold

# Animals

- Wolves have black and grey and brown fur
- Bears have big furry coats to keep them warm
- Bears can be very dangerous. Watch out they might want to eat you as a snack!
- There are grizzly, black, brown and polar bears

- In the night you could see owls!
- Owls sit in trees during the night till dawn

# Vegetation (plants)

- Plants in the arctic region have to be really strong and healthy to survive blizzards and snow storms.
- Be aware of the red mushrooms! ( they re pousines)
- There plants are not easy to dry out they get lots of water from the ground.

# Natural Resources

What they were looking for.

- There are lots of natural resources in the arctic region.
- When people came to the arctic they were looking for ores like gold and

Sad face...

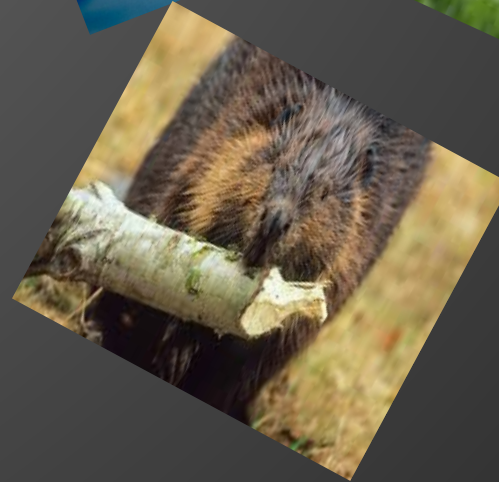

## What they found.

- All they found were animals, so the animal skins were the natural resources. Some of the natural resources are buffalo, beaver skin, muskrat skins, and rabbit skin. There are also some other natural resources are wood and the oil.

## Pictures...

# Bodies Of Water

- There are huge bays
- One of the bays is Baffin bay
- The Arctic ocean is a major body of water
- There are also a bunch of lakes, rivers and rapids
