

THE CORDILLERA REGION

Landforms

In the cordillera there are many rolling hills. Basically just normal hills. Many mountains are big, pointy and have snow on top.

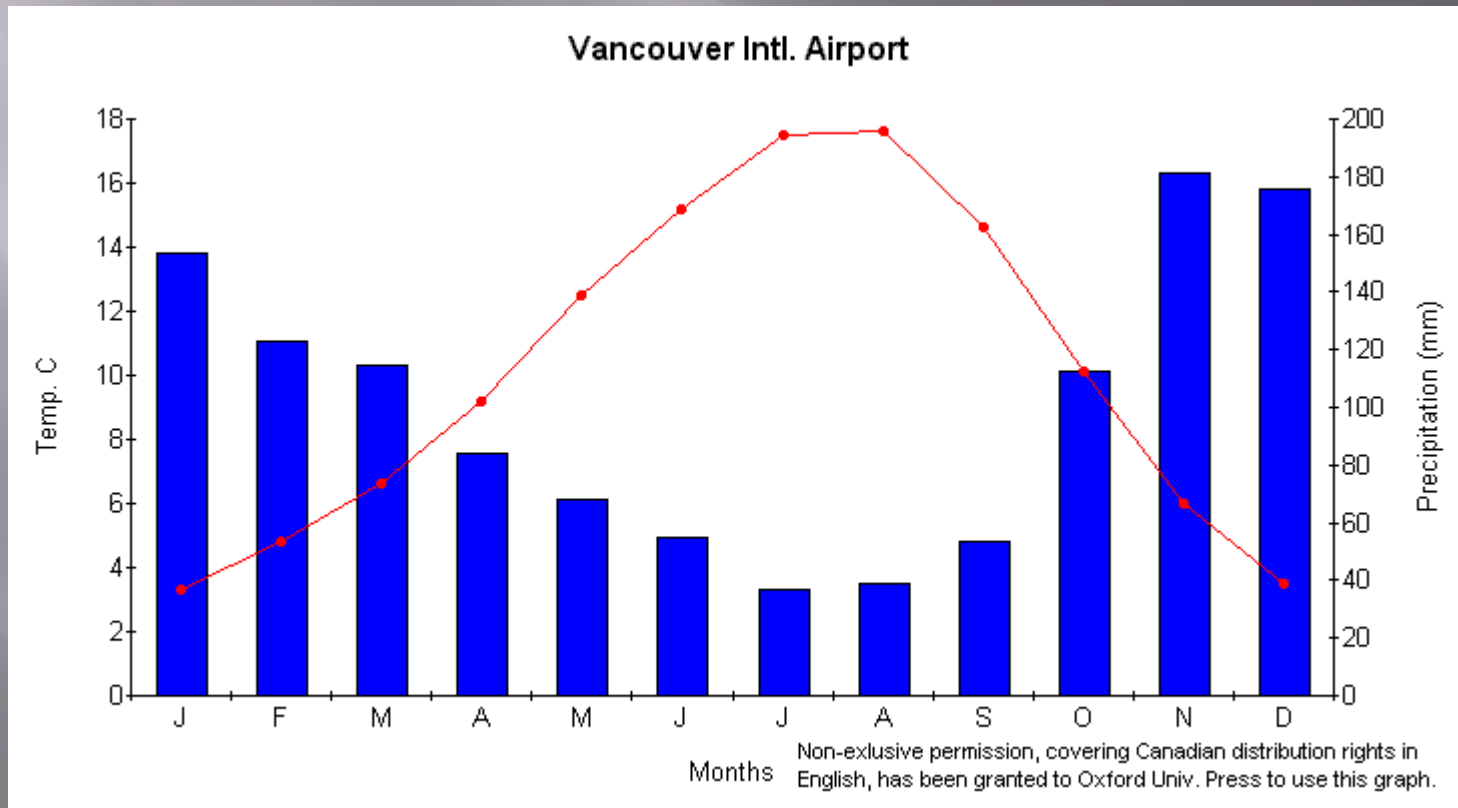

There are a few rainforests in the Cordillera. Only about 2-3.

There are many lush farmlands. Farmlands are really precious to the people of the cordillera.

There are also many flatlands, deep valleys and rolling pastures. There is one true desert which is big. 😊

Climate

The climate in B.C is very warm ,the summers are cool and sunny and the winters are damp and cool.

Did you know that B.C has the most gentlest climate in Canada? Well that's true! January's average temperature is 7 degrees celsius, that would be pretty warm compared to here!

So you would think that the cordillera is a great place ,it is cold in the north but warm in the south

.

Animal life

There are many animals in the cordillera region. Here are some of the animals spirit bear, timber wolves, golden eagle, sea lions, sea otters, snow geese, moose, cougars, black tailed deer. These are a few, there are lots more.

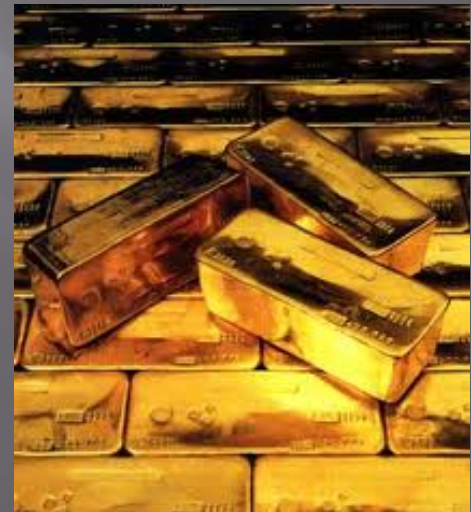

The main animal is a spirit bear. The spirit bear is a blondish color. It is a subspecies of the black bear. When the spirit bear is born it weighs as much as half a pound. When older it weighs 150-300 pounds. Spirit bears can run up to 55km per hour.

Spirit bears can live up to 25 years on the wild they can go without food for up to seven months during hibernation in northern areas. There are 1200 spirit bears in the wild and that's the main animal of British Columbia.

Natural resources

The cordillera region is famous for its fishing and coastal forest. There are more than 60 million of acres forest in the cordillera region. Gold, copper, jade , hunting, rich in resources, rivers, power, silver, and trees.

Bodies of water

Today the ocean provided jobs in the region. For thousands of years the ocean as provided many people with food. The mountain lake such as Louise in Alberta is famous.
