

# My Weather Journal

Directions for tracking weather:

1. Track the weather each day for a full week.
2. Record information about the weather in the morning and evening.
3. You may use a website, tv, radio, or your own observations to track the weather.
4. For wind speed, you can find the exact value or use Beaufort's scale as a guide.
5. In the sky section, record information about the clouds. Tell the colour and type of clouds.
6. In the precipitation section, tell what type, if any, precipitation is falling.

**Day 1**

(morning)

Date: \_\_\_\_\_ Time: \_\_\_\_\_

Wind Speed: \_\_\_\_\_
